

Claret Civil Engineering Ltd is committed to a significant and ongoing reduction in our company's carbon emissions, not just for the benefit of the business, this is for the communities we work in and the future generations who may be affected by our actions.

Our company is signing this charter and pledging to:

The Principles:

- The Managing Director, all other company Directors and managers have made a commitment to develop and maintain a carbon reduction plan
- We will Comply with all environmental laws, regulations and follow best practice, to aid in the reduction of our company's environmental impact
 - We will communicate all our environmental impacts, including the carbon footprint of our business and our partners to our employees
- We will aim to continually improve our environmental impact and actively welcome new ideas for carbon reduction, through ongoing assessment and review
- We shall develop our Environmental Policy to reflect these commitments and refer to them in our Corporate and Social Responsibility Policy as well as our Sustainability Policy

Leadership Commitment and Culture:

- Provide awareness and understanding of the impact of our actions on the environment and local communities we work within
- Nurture a culture that supports and invests in people along with the environment we work, educating through methods such as tool box talks to reduce water, and energy consumption
 - Modify our processes to emit less waste or emissions, by reducing, reusing and recycling where practicably possible
 - Encourage lower fleet CO2 emissions and fuel costs through sustainable practices and eco-friendly operational strategies

As a company, we are committed to carbon reduction, and we will take action to minimise our impact on the environment and leave a positive legacy for future generations.
